

E. T. Whittaker

EDMUND T. WHITTAKER

Nato nel 1873 a Southport in Inghilterra. Professore di Matematica all'Università di Edimburgo. Accademico Pontificio dal 28 ottobre 1936.

M. A. (Magister Artium) dell'Università di Cambridge.

È dottore *honoris causa* in Legge dell'Università di St. Andrews e dell'Università di California, e dottore *honoris causa* in Scienze dell'Università di Dublino.

Professore di Matematica all'Università di Edimburgo dal 1912.

INDIRIZZO:

Edinburg (Scozia) - George Square, 48

PUBBLICAZIONI

- A Course of Modern Analysis*, Fourth edition (with G. N. Watson), 1927.
- A Treatise on the Analytical Dynamics of Particles and Rigid Bodies, with Introduction to the Problem of Three Bodies*, Third edition, 1927.
- The Theory of Optical Instruments* (Cambridge Tracts in Mathematics, n. 7). First edition, 1907, reprinted at various times.
- A History of the Theories of Aether and Electricity, from the age of Descartes to the close of the nineteenth century*, 1910.
- The Calculus of Observations: a treatise on Numerical Mathematics*, second edition, 1926.
- On Lagrange's Parentheses in the Planetary Theory*, « Messenger of Mathematics », XXVI, pag. 141-144, 1897.
- On the connexion of Algebraic Functions with Automorphic Functions*, « Philosophical Transactions », CXCII, pag. 1-32, 1898.
- British Association Report on the Progress of the Solution of the Problem of Three Bodies*, « Brit. Assoc. Report », 1899, pag. 121-159, 1899.
- On the Reduction of the Order of the Differential Equations of a Dynamical System, by use of the Integral of Energy*, « Messenger of Mathematics », XXX, pag. 93-97, 1900.
- On Periodic Orbits*, « Monthly Notices R.A.S. », LXII, pag. 186-193, 1902.
- On the Solution of Dynamical Problems in terms of Trigonometric Series*, « Proc. Lond. Math. », XXXIV, pag. 206-221, 1902.
- On Periodic Orbits in the Restricted Problem of Three Bodies*, « Monthly Notices R.A.S. », LXII, pag. 346-352, 1902.
- Note on a Function analogous to Weierstrass' Sigma-Function*, « Messenger of Math. », XXXI, pag. 145-148, 1902.

- On the General Solution of Laplace's Equation and the Equation of Wavemotions*, « Monthly Notices R.A.S. », LXII, pag. 617-620, 1902.
- On a New Connexion of Bessel Functions with Legendre Functions*, Proc. Lond. Math. Soc. », XXXV, pag. 198-206, 1903.
- On the Partial Differential Equations of Mathematical Physics*, « Mathematische Annalen », LVII, pag. 333-355, 1903.
- On the Functions associated with the Parabolic Cylinder in Harmonic Analysis*, « Proc. Lond. Math. Soc. », XXXV, pag. 417-427, 1903.
- An expression of certain known Functions as generalised Hypergeometric Functions*, « Bull. Amer. Math. Soc. », X, pag. 125-134, 1903.
- An expression of the Electromagnetic Field due to Electrons by means of two Scalar Potential Functions*, « Proc. Lond. Math. Soc. », (2) I, pag. 367-372, 1904.
- On the distribution of Energy in the Continuous Spectrum*, « Monthly Notices R.A.S. », LXVII, pag. 85-88, 1906.
- On the Resolving Power of Spectroscopes*, « Monthly Notices R.A.S. », LXVII, pag. 88-90, 1906.
- On the Theory of Capillarity*, « Proceedings of the Royal Society », LXXXI A, pag. 21-25, 1908.
- Sunspots and Solar Temperature*, « Observatory », XXXI, pag. 372-374, 1908.
- On the Dynamical Nature of the Molecular Vibrators which emit Spectra of the Banded Type*, « Proceedings of the Royal Society », LXXXV A., pag. 262-270, 1911.
- (with C. MARTIN) *On the Variable RW Cassiopeiae*, « Monthly Notices R.A.S. », LXXI, pag. 511-516, 1911.
- On the Law which governs the Variations of SS Cygni*, « Monthly Notices R.A.S. », LXXI, pag. 686-690, 1911.
- Prinzipien der Störungstheorie und allgemeine Theorie der Bahnkurven in dynamischen Problemen*, « Encyclopädie d. math. Wiss. », VI, 2, pag. 512-556, 1912.
- On the Functions associated with the Elliptic Cylinder in Harmonic Analysis*, « Proc. VI International Congress of Maths. », I, pag. 366-371, 1912.

- On the Continued Fractions which represent the Functions of Hermite*, « Proc. Edin. Math. Soc. », XXXII, pag. 65-74 (1914).
- On the General Solution of Mathieu's Equation*, « Proc. Edin. Math. Soc. », XXXII, pag. 75-80, 1914.
- On an Integral-Equation whose solutions are the Functions of Lamé*, « Proc. Roy. Soc. Edin. », XXXV, pag. 70-77, 1914.
- On Lamé's Differential Equation, and Ellipsoidal Harmonics*, « Proc. Lond. Math. Soc. » (2) XIV, pag. 260-268, 1914.
- On a class of Linear Differential Equations whose solutions satisfy Integral Equations*, « Proc. Edin. Math. Soc. », XXXIII, pag. 14-23, 1914.
- On the Functions represented by the Expansions of the Interpolation Theory*, « Proc. Roy. Soc. Edin. », XXXV, pag. 181-194, 1915.
- A simple Nomogram for the Solution of Quadratic Equations*, « Edin. Math. Notes », n. 19, pag. 215, 1915.
- On the Theory of Continued Fractions*, « Proc. Roy. Soc. Edin. », XXXVI, pag. 243-255, 1916.
- On the Adelpic Integral of the Differential Equations of Dynamics*, « Proc. Roy. Soc. Edin. », XXXVII, pag. 95-116, 1917.
- On the Latent Roots of Compound Determinants and Brill's Determinants*, « Proc. Edin. Math. Soc. ». XXXV, pag. 2-9, 1917.
- On the Numerical Solution of Integral-Equations*, « Proc. Roy. Soc. », XCIV, pag. 367-383, 1918.
- A formula for the solution of Algebraic and Transcendental Equations*, « Proc. Edin. Math. Soc. », XXXVI, pag. 103-106, 1918.
- On Determinants whose elements are Determinants*, « Proc. Edin. Math. Soc. », XXXVI, pag. 107-115, 1918.
- On some disputed questions of Probability*, « Trans. Fac. Actuaries ». VIII, pag. 103-114, 1919.
- On Tubes of Electromagnetic Force*, « Proc. Roy. Soc. Edin. », XLII, pag. 1-23, 1921.
- On the Quantum Mechanism in the Atom*, « Proc. Roy. Soc. Edin. », XLII, pag. 129-142, 1922.
- On Sylvester's Dialytic Method of Elimination*, « Proc. Edin. Math. Soc. », XL, pag. 62-63, 1922.

- On a new method of Graduation*, « Proc. Edin. Math. Soc. », XLI, pag. 63-75, 1923.
- On the Theory of Graduation*, « Proc. Roy. Soc. Edin. », XLIV, pag. 77-83, 1924.
- On the adjustment of Sir J. J. Thomson's Theory of Light to the classical Electromagnetic Theory*, « Proc. Roy. Soc. Edin. », XLVI, pag. 116-125, 1926.
- On a simple Light-quantum*, « Phil. Mag. », II, pag. 1137-1139, 1926.
- On Hilbert's World-Function*, « Proc. Roy. Soc. » (A) CXIII, pag. 496-511, 1927.
- The outstanding problems of Relativity*, « Brit. Ass. Rep. Leeds », pag. 16-26, 1927.
- On Electric Phenomena in a Gravitational Field*, « Proc. Roy. Soc. » (A), CXVI, pag. 720-735, 1927.
- Note on the law that light-rays are the Null Geodesics of a Gravitational Field*, « Proc. Camb. Phil. Soc. », XXIV, pag. 32-34, 1928.
- The influence of gravitation on electromagnetic phenomena*, « Journ. Lond. Math. Soc. », III, pag. 137-144, 1928.
- On the recurrence-formulae for Mathieu Functions*, « Journ. Lond. Math. Soc. », IV, pag. 88-96, 1929.
- On the recurrence-formulae for Mathieu Functions*, « Journ. Lond. Math. Soc. », IV, pag. 88-96, 1929.
- What is energy?*, « Math. Gazette », XIV, pag. 401-406, 1929.
- On hyper-lemniscata functions, a family of automorphic functions*, « Journ. Lond. Math. Soc. », IV, pag. 234-238, 1929.
- Parallelism and Teleparallelism in the newer theories of space*, « Journ. Lond. Math. Soc. », V, pag. 68-80, 1930.
- Oliver Heaviside*, « Bull. Calcutta Math. Soc. », XX, pag. 199-220, 1930.
- On the solution of differential equations by definite integrals*, « Proc. Edin. Math. Soc. » (2), II, pag. 189-204, 1931.
- On the definition of distance in curved space, and the displacement of the spectral lines of distant sources*, « Proc. Roy. Soc. », CXXXIII, pag. 93-105, 1931.

- (with W. O. KERMAK and W. H. MC CREA) *On properties of null geodesics and their application to the theory of radiation*, « Proc. Roy. Soc. Edin. », LIII, pag. 31-47, 1933.
- On Gours' theorem and the concept of mass in general relativity*, « Proc. Roy. Soc. », CXLIX, pag. 384-395.
- On the relations of the tensor-calculus to the spinor-calculus*, « Proc. Royal Soc. », CLVIII, pag. 38-46, 1935.
