

Luis F. Leloir

Paris, France, 6 Sep. 1906 - Buenos Aires, Argentina, 2 Dec. 1987

Title Professor of Biochemistry, Instituto de Investigaciones Bioquímicas 'Fundación Campomar', Buenos Aires, Argentina.
Nobel laureate in Chemistry, 1970

Nomination 22 Apr. 1968

Summary of scientific research

Dr Luis F. Leloir has for several years been working on the studies of the biosynthesis of saccarides such as trehalose, sucrose, sucrose-phosphate, glycogen and starch.

Nucleotide diphosphate sugars act as donors of monosaccharide in these processes. The biosynthesis of glycoproteins has also been studied. In this process it was found that dolichol phosphate is involved.
