

## Prof. Jane Lubchenco

Distinguished University Professor and Marine Studies  
Advisor to the President

### **Most important awards, prizes and academies**

A member of the National Academy of Sciences, the Royal Society, The World Academy of Science and others, her awards include 22 honorary doctorates and the highest awards from both the National Academy of Sciences (the Public Welfare Medal) and the National Science Foundation (the Vannevar Bush Award).

### **Summary of scientific research**

A marine ecologist with expertise in the ocean, climate change, and interactions between the environment and human well-being, she focuses on actions that would achieve healthy, resilient ocean ecosystems and people. She also proposed 'A New Social Contract for Science' in which scientists have a moral obligation to engage with society, help solve urgent societal problems, and act with humility, transparency and honesty.

---
