

Prof. Yves Quéré

Professor and Co-Chair of the Inter Academy Panel on International Issues (IAP)

Most important awards, prizes and academies

Awards: Commandeur, Légion d'honneur; Commandeur, Légion d'honneur. *Academic*

Appointments: Chairman, Department of Physics, École Polytechnique (1987); Chairman, Senate of Professors, École Polytechnique (1989). *Academies:* Corresponding Member (1980), Member (1991) and Foreign Secretary (1993), Académie des sciences; Co-Chairman of InterAcademy Panel for International Issues (IAP) (2000, 2006); Pontificia Academia Scientiarum (2003). *Honorary Degrees:* Polytechnic University, Bucharest (1996); Science Academy of Belarus (2003).

Summary of scientific research

Main domains of research, in experimental solid state physics, have been: 1) Determination of properties of point defects (like: vacancies, or interstitials) in metals such as silver, gold, uranium, etc. 2) Observation of radiation damage (neutrons, protons, heavy ions, etc.) in metals and ionic crystals. Study, in particular, of irradiation swelling and growth in nuclear materials. 3) Scientific leadership of a lab devoted to electronic and physical properties of Pu, Np, etc. with medical applications 4) Study of the interactions between particles and solids, particularly in the case of Ion

Main publications

Books: Irradiation effects in fissile materials, with Jean Leteutre, North Holland (1966); *Physics of Materials*, Gordon and Breach (1998); *La science institutrice*, Odile Jacob (2002); *La sagesse du physicien*, L'œil neuf (2005); *L'enfant et la science* (avec G. Charpak et P. Léna), Odile Jacob (2005); *La culture, en mémoire de France Quéré* (collectif), Odile Jacob (2006); *Doubles croches*, Le Pommier, 2010; *Un coquillage au creux de l'oreille*, Odile Jacob, 2010; *De la beauté*, Odile Jacob, 2021. *Articles: Quéré, Y., Nakache, F., Évaluation du volume d'une pointe de fission dans l'uranium, J. Nat. Nucl., 2, p. 203 (1959); Quéré, Y., Pham, F., Blin, J., Sur le gonflement exagéré dans les combustibles nucléaires (a theory of "Breakaway Swelling"), Reactor Science and Techn., 17, p. 15 (1963); Quéré, Y., Interactions between quenched vacancies and oxygen in silver, J.
